WAYSIDE GARDENS

are located at

MENTOR, OHIO

Twenty-five miles east of Cleveland, on the Cleveland-Painesville Road, at Stop 67, C. P. & E.

Electric Line

Telephone, Mentor 39-K.

Stock Offered

All of the stock offered is grown on our grounds, that grown from cuttings and divisions we know to be clean and true and plants grown from seeds are from stocks obtained from the most reliable sources. The seeds don't always come true.

Our plants are all field grown, are given constant care and cultivation and when sent out are strong and well developed, much larger than the pot-grown plants offered by most houses.

Terms of Payment

Our terms of payment are cash on delivery, which does not mean that we ship C. O. D. We deliver the goods and mail bills at the same time, and expect payment within a few days. People unknown to us will please send cash or references with their order.

Guarantees

We guarantee all nursery stock furnished by us to be first-class, true to name.

There are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

Inspection and Fumigation

Our stock is regularly inspected and certificate will be sent with each shipment. Stock will be fumigated when requested or when State laws require it.

Risk

All goods are at purchaser's risk after they are delivered to the forwarding companies and we receive their receipt for the shipment in good condition.

Shipping Directions

Please give explicit shipping directions, stating whether stock is to be shipped by freight or express, and by what route. Early orders for shrubs and bulbs can generally be shipped safely by freight.

Parcels Post

Small shipments can be sent by parcels post. All such shipments will be sent insured, insurance and postage to be paid by the customer.

AQUILEGIA (Columbine)

As a cut flower the Long Spurred Aquilegias are the daintiest of our outdoor grown flowers.

They come in blues and whites and yellows and shades of pink and rose in strains reasonably true.

Practically all the various shades and colors are in the *Coerulea* Hybrids. They remain in bloom for a long season and are vigorous and long lived.

CHRYSANTHEMUM—Hardy Pompon

FULL FIELD GROWN CLUMPS—NOT DIVISIONS

These are the small-flowered Chrysanthemums of the old-fashioned gardens, and bloom in October and November after almost all flowers are gone. They are showy in the garden, and effective as cut flowers and, being perfectly hardy and of easiest culture, can be successfully grown in any garden. We offer a fine collection of the best varieties, ranging from white to deep crimson.

	<i>Per Doz.</i>	<i>Per 100</i>
Boston, bronze	2.00	15.00
Rhoda, very light pink	2.00	15.00
Red Button, red	2.00	15.00
Flamingo, bronze	2.00	15.00

Belden's White	2.00	15.00

LARGE-FLOWERED CHRYSANTHEMUMS

We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy, 3 to 4 feet high. When in bloom are a perfect mass of flowers,

Old Fashioned Hardy , large flowered garden mums, red, pink, white and yellow, separate colors. Field clumps	1.70	12.00

Wayside Gardens, Mentor, Ohio

DELPHINIUMS (Tall English)

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increases in size, in beauty, and often in quantity, year after year. Delphiniums may not be the most beautiful hardy plants, but they are among the most beautiful, and nothing can be more satisfactory. Some varieties growing 8 feet high in rich soil. They have immense spikes of most beautiful flowers, of every imaginable shade of blue, and their season is long, in fact, they will bloom from spring till fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in summer the plants are not too forward, and that they be well watered if the weather be dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. They are grand grown in masses of large groups and may be associated with shrubs to great advantage. A succession of flowers may be expected from spring to early autumn, especially if the spikes which have done flowering early be cut down to the ground; fresh growth will then be produced which will give blossom. Watering in summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through winter and spring. Any garden soil suits the Delphiniums.

Special Offer of English Delphiniums

	<i>Per Doz.</i>	<i>Per 100</i>
Fine Mixed English , grown from seed of famous named sorts	2.00	15.00
Extra-selected Varieties Each 50 cents		

DELPHINIUM (Belladonna)

They are our best blue flower, are perfectly hardy and established plants produce a number of spikes, giving three crops during the season.

They are in demand by every florist for decorating the light blue Belladonna combining especially well with other flowers and the two and three-year-old plants of Belladonna can be forced in the greenhouse to great advantage.

	<i>Per Doz.</i>	<i>Per 100</i>

FUNKIA (Day Lily)

Desirable foliage plants which will thrive in sun or shade.

Variegata.. Variegated foliage; blue flowers. Beautiful edging plant. Per eye or crown, 10c	1.30	8.00
---	------	------

FOXGLOVE (Digitalis)

For stately and picturesque beauty it is not to be surpassed and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchard or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial. Planted in the fall, Foxgloves will bloom well the following season in 3 colors.....

GAILLARDIAS (Improved)

We consider the Gaillardia one of the most desirable hardy plants in cultivation, and our strain of these brilliant-flowered plants to be the finest extant. Though such an ornamental addition to the herbaceous border, the perennial Gaillardia is content with extremely simply treatment. Dig the soil deeply and enrich with well-rotted manure. We recommend the Gaillardia for bedding purposes as well as for borders. Every one will have noticed how grandly Gaillardias have thriven through the recent draught; they seem hardly to need water, but we recommend watering liberally to insure the finest flowers. The gay blossoms are obtainable in perpetual profusion from June to November, and the greater the draught and scarcity of other flowers the more the utility of the perennial Gaillardia is demonstrated. No more brilliant and beautiful sight can be imagined than a large bed of Gaillardias, with their profusion of highly colored flowers of all shades. Some of the varieties of our improved strain measure fully 5 inches in diameter.

	<i>Per Doz.</i>	<i>Per 100</i>
In mixed colors	1.30	8.00

GYPSOPHILA

Paniculata compacta (Baby's Breath). When in bloom in August and September it forms a symmetrical mass 2 to 3 feet in height and as much through, of minute white flowers having a beautiful gauze-like appearance

Wayside Gardens, Mentor, Ohio

HOLLYHOCKS

Painters choose single Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common, single Hollyhock, is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group or mass of single Hollyhocks, and once planted they will literally take care of themselves, even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. We are determined to have single Hollyhocks. We collected seed from old-fashioned gardens and had thousands of plants grown for our customers. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be top-heavy. Hollyhocks planted in the fall will bloom the following summer.

	<i>Per Doz.</i>	<i>Per 100</i>
Double , separate colors, red, maroon, white, yellow, pink	1.30	8.00
New Allegheny . Immense semi-double flowers, with fringed edges; very beautiful.....	1.30	8.00

GERMAN IRIS

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it, it throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Planted in late August or early September they flower very freely the first season.

For use as cut flowers they are rapidly gaining in popularity with Florists.

LILY OF THE VALLEY

Blooming Pips	1.00	5.00
Excellent stock for planting out-doors.		

RARE LILY FROM CHINA

LILIUM REGALE or MYRIOPHYLLUM

(The Regal Lily'. Mr. E. H. Wilson, the famous plant collector, collected the original bulbs in North-Western China. He considers this the finest of all Lillies. It is absolutely hardy, and is excellent for forcing. It has been predicted that this will become the Easter Lily of the future, and being so hardy, may be grown at home. The flowers are white, slightly suffused with pink, with a beautiful shade of canary-yellow at the center, and extending part way up the trumpet. It is delightfully perfumed, reminding one of the Jasmine, and lacking the heavy, oppressive odor of most Lillies. Blooms out-or-doors early in July. Awarded a Gold Medal by the Massachusetts Horticultural Society, and a first-class certificate at the Royal International Exhibition, London, 1912. (Bulbs ready in October.)

Strong Bulbs each 50 cents Shipment Oct. 1

PHLOXES—HARDY PERENNIAL

The beauty and usefulness of these grand border plants give to them a deservedly first place among hardy plans. For cutting, their large trusses go a long way in floral decoration. In color they range from pure white to the richest crimsons and purple, and from soft rose and salmon to bright coral-red, all having a delicate fragrance. **Perennial Phloxes** succeed in almost any soil enriched with manure, but are much benefited by a mulching of decomposed manure in spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in autumn. These later blooms are often finer than the first.

DESCRIPTIONS AND PRICE LIST OF PEONIES

The varieties we offer are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we shall be pleased to give by letter further information to intending purchasers.

	<i>each</i>	<i>each</i>	<i>each</i>
	1 yr.	2 yr.	3 yr.
Dorchester. (Richardson 1870), pale pink. Large, compact, rose type; fragrant; medium height; strong, thick stems. Late mid-season, 3-5 eyes, 20c.....	.40	.75	1.00
Duchess de Nemours. (Calot, 1856.) Guard petals white, center lemon-yellow, cup-shaped; at first it develops into a large bloom, gradually fading to white; fragrant; strong grower and free bloomer. Extra good commercial variety. Follows two or three days later than Festiva Maxima, 3-5 eyes, 20c.....	.40	.75	1.00
Edulis Superba. (Lemon, 1834.) Dark pink, even color; large, loose, flat crown when fully open. Very fragrant; upright growth, early bloomer. One of the best commercial peonies. There is much confusion over this variety being sold under twenty or more different names, 3-5 eyes, 20c.....	.35	.75	1.25
Eugene Verdier. (Calot, 1864.) Very light pink with lilac-white collar. Large, rose type; extra strong-growing plant; erect, rather dwarf. Late. 3-5 eyes, 25c.....	.75	1.50	3.00
Festiva Maxima. (Mieliez, 1851.) Paper-white crimson markings in center. Very large and full, rose type; very tall, strong growth. Early, 3-5 eyes, 20c.....	.40	.75	1.00
Marie. (Calot, 1868.) Lilac-white fading to milk-white. Medium size, compact, rose type; fragrant; very tall. Very late, 3-5 eyes, 25c.....	.75	1.00	1.50
Mons. Jules Elie. (Crousse, 1883.) Pale lilac-rose, silvery reflex. Very large, compact, globular; very fragrant; tall, vigorous growth. Early, 3-5 eyes, 30c.....	1.00	1.50	2.00

Wayside Gardens, Mentor, Ohio

	<i>each</i> 1 yr.	<i>each</i> 2 yr.	<i>each</i> 3 yr.
Mlle. Leonie Calot. (Calot, 1861.) Very delicate shell-pink, center darker. Medium size, very compact, globular; on weak stems. Late midseason, 3-5 eyes, 30c.....	.50	.75	1.25
Madame Crouse. Pure white with faint crimson markings. Large, globular, crown eye; fragrant; medium height. Mid-season. 3-5 eyes, 25c.....	.75	1.00	1.50
Rubra Superba. (Richardson, 1871.) Deep carmine-crimson. Large, fragrant, rose type; medium height. 3-5 eyes. 25 cents	.50	1.00	1.50

MIXED PEONIES

We have a few thousand mixed peonies. We can supply these at \$6 per 100, 3 to 5 eyes.

	<i>Per Doz.</i>	<i>Per 100</i>
RUDBECKIA		
Purpurea. Large crimson-maroon flowers; very distinct	1.50	10.00
"Golden Glow." Double Rudbeckia. Grows 10 to 12 feet high, and is undoubtedly one of the most effective plants in cultivation.....	1.30	8.00
Newmanii. Golden-yellow with maroon cone.....	1.50	10.00
SAPONARIA		
Ocymoides splendens. Pretty border and rockery plant; flowers rosy-crimson	1.20	7.00
SPIREA		
Filapendula fl. pl. A beautiful dwarf variety, with elegant fern-like foliage.....	1.70	12.00
Filipendula. Single	1.50	10.00
SALVIA		
Azurea. Rocky Mountain, pretty sky-blue flowers in greatest profusion	1.30	8.00
Pitchery. Blooms later than Azurea.....	1.50	10.00
SEDUM		
Brilliant	1.50	10.00
Spectabile. A fine fall-flowering plant with great heads of purple flowers.....	1.20	7.00
Acre. Fine for covering graves and for carpeting..	1.30	8.00
SWEET WILLIAM		
See <i>Dianthus barbatus</i> .		
TUNICA		
Saxifraga. A pretty tufted plant with light pink flowers, produced all summer; useful either for the rockery or the border.....	1.30	8.00

Wayside Gardens, Mentor, Ohio

Per Doz. Per 100

THALICTRUM DIPTEROCARPUM

A pretty and distinct species, with flowers of a charming shade of lilac mauve, which is brightened by a bunch of lemon-yellow stamens and anthers. The plant is of strong growth, about 4 feet high; the dainty flowers are produced in graceful sprays during August and September..... 2.50 20.00

TRITOMA (Red Hot Poker or Torch Lily)

Pfitzerii 2.00 15.00

VERONICA

Spicata. Violet-blue flowers on long spikes; dwarf habit 1.30 8.00

VIOLA CORNUTA (Hardy Pansy)

This is the very best edging plant for the hardy border or garden, for properly cared for these plants remain in full bloom from May until October. The great secret of their continuous bloom, though is the fact that they must be sheared several times during the season, so that the flowers do not go to seed.

<i>Admiration</i> , deep purple	1.50	10.00
<i>Blue Perfection</i> , light blue	1.50	10.00
<i>Golden Yellow</i>	1.50	10.00
<i>White</i>	1.50	10.00
<i>Mixed</i> , many shades and markings.....	1.20	7.00
<i>Valeriana</i> , mixed colors	1.20	7.00
